- Practice development and COE icubation
- Directing technology intensive delivery Programs

INDUSTRIES & DOMAINS
- Digital Marketing, Retail, Automotive and Telecom, Banking (Payments) and Insurance
- Knowledge management and Collaboration
- Localization and Translation

DIGITAL ACUMEN
- Commerce, Content and Mobility solutions
- Information architecture and Usability design

SOLUTION ARCHETYPES
- Cloud native, API-First Micro Services
- Internet scale applications

KEY COMPETENCIES & STRENGTHS

WORK EXPERIENCE

Cheif Technical Officer (C.T.O.)
Solutions by Text | April 2019-Present

Associate Director (Technology Architecture)
Accenture India | March 2014-March 2019

Digital Practice Head and Principal Architect
Valtech (Erstwhile Netkraft) | June 1998-February 2014

TRAININGS & CERTIFICATIONS

| Application Security Jun 2017 | Design thinking Coach Jan 2016 | Scrum Master Aug 2013 | Enterprise Architecture Framework Mar 2013 | Scrum Master Aug 2011 |

PROFESSIONAL EDUCATION

Bachelor of Engineering - Information Science
Bangalore University | 1998

RECENT WORK PORTFOLIO AND RESPONSIBILITIES

At Accenture as Associate Director with the 'Advanced Technology & Architecture' (ATA) division:

About ATA: The ATA division is a collection of highly-skilled senior technology-leaders that work across client teams in a consulting capacity, working with C-suite at large enterprises, typically performing assessments, strategy roadmaps; and driving innovation & competitive differentiation internally.

As, **Global Architect** of a large Multi-tenant, Cloud Native - **Data Integration Platform** for a large – Bio-Tech start-up division of a large Pharmaceutical company, my responsibilities included:

- Providing technical leadership across the overall program
- Addressing performance, scalability challenges and improving the engineering efficacy.

Accomplishments:

- Delivered the performance 1500 TPS and linear scalability, within agreed licensing constrains
- Developed a performance and capacity model as a premise to negotiate licensing
- Improved deployment frequency from bi-monthly to a 3-week cadence.

As, **Lead Architect** for a **Global Bank** (Payments division):

- Lead the definition of a cloud-native, microservices based architecture for the new payment's platform
- Coached the team in helping adopt modern engineering practices and organization design.

Accomplishments:

- Instrumental in winning a multi-year contract for over $12 Million
- Established a framework for maturity management and governance.

As, Lead – Lean Architecture COE:

- Incepted a Community of practice (CoP) to advocate for lean and agile engineering practices
- Established a boot-camp, as an industrialized process to develop capabilities at scale
- Directed the development of the 'Liquid Innovation Platform' as a lever to accelerated delivery

Accomplishments:

- Was instrumental in origination of new business valued at over $70 million in a single year.
- Oversaw training of over 300 engineers and architects on Microservices architecture style

At SBT, our CTO Shuaib Mumtaz has the mandate of re-defining SBT into being a technology-led, innovation driven organization. He oversees all aspects of technology across our product portfolio and leads the product engineering - which in simple words, means that he makes life easy for the rest of us by being on the lookout for innovative yet simple ways to solve problems.

With over twenty years of experience in the technology industry, Shuaib is an ex-Accenture Director, in the vertical of Advanced Technology Architecture. Having started out after his Bachelor of Engineering in Information Science from Bangalore University, this systems thinker and solutions' craftsman; passionate about simplicity, agility, and innovation - has successfully set-up practices & C.O.Es and directed complex technical programs for large corporations including several Fortune-100 enterprises.

His experience across a broad range of industries and solution areas enables Shuaib to be a great resource for consultation to pretty much every aspect of the value chain: from marketing or product design, all the way to customer support, at the company. As someone with a keen sense his team and how it functions, you can count on Shuaib to effectively use some of his favorite poetry and couplets to lift up the room's spirits in inspiration and motivate people.

When Shuaib is not leading various tech-teams or delving further into his niches of Digital Marketing, Retail, Automotive, Telecom, Banking (Payments) and Insurance and others, he likes to read pretty much anything he can get his hands on, enjoys horse riding and working out. Besides these, you might also find Shuaib - the family man - playing around with his little ones or helping them hone their interest of the day. After all, in his own words, it is his child-like enthusiasm towards learning that enables him to see through the obvious and seek out fundamentals and reapply them, to solve problems.

In all, Shuaib likes to live by the motto: "True success, is what will endure past your lifetime... it's the difference your living makes to other lives" – and we can't help but admit, it makes him a pleasure to work for and with!
